

DHC® 5 Stage Intelligent Switching Power Battery Chargers

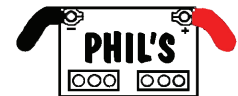

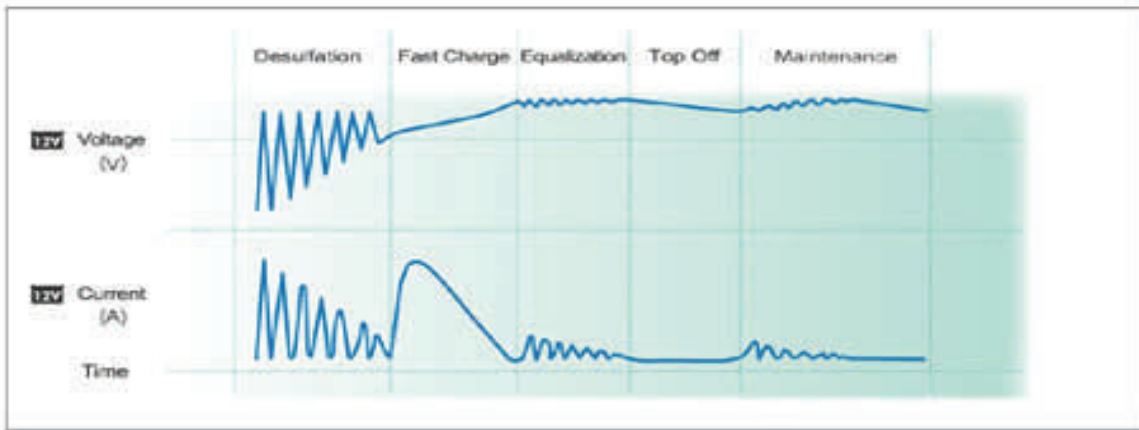

ENERGY SAVING: UP TO **20%** TIME SAVING: **15** Times FASTER

SC212PA - 2 Amp 12 Amp Automatic Battery Charger Maintainer
Charges 12V SLI/VRLA/GEL/AGM, CAL/CAL & Spiral Batteries

Automatic design not only charges a battery efficiently, but also prolongs the lifetime of the requisite battery.

5 Stages:

- Desulfation:
Saves a deeply discharged or a light sulphated battery for recovery.
- Fast Charge:
Charges battery to 75% in the fastest and most efficient manner.
- Equalization:
When the battery reaches 75% charge, the charger starts a **charge pulse** with a smaller stream current.
- Top-Off:
Fully charge the battery without overcharging the battery.
- Maintenance:
Maintains the battery in fully-charge status.
