

Battery Charger-Maintainer

AccuSense Charge® products are microprocessor-based chargers. Designed to increase battery life, lower operating costs and improve system efficiency, HD Digital Technology provides 5-stage battery charging and maintenance.

- Pre-qualification battery test
- Constant current bulk charge
- Absorption finish charge
- Maintenance/float charge
- Switches automatically to 28 day monitoring
- Built-in timer for battery protection
- 3 LED indicator display

- *Perfect for any conventional, maintenance free 6/12 volt battery or 12 volt AGM battery*
- Provides true 100 percent recharge and extends battery performance and life for:*

- Campers
- Motorcycles
- Automobiles
- Jet Skis
- ATVs
- Vintage Cars
- Boat Batteries
